

PSCAD v5.0.2 Update 1 (v5.0.2.1) – Release Notes

PSCAD v5.0.2 Update 1 (October 17, 2023) incorporates the fixes that were made in [PSCAD v5.0.2 Hot Fix 1](#):

- Resolves an issue in PSCAD 5.0.2 Release that can occur in certain circumstances, (Bug 9682), in which the generated psout file can become corrupted, when using any of the following compilers:
 - GFortran 8.1 (x64)
 - GFortran 8.1 (x86)
 - GFortran 4.6.2 (x64)
 - GFortran 4.6.2 (x86)
- Fixes an issue (Bug 9673) of initializing a large number of output channels with Intel Fortran.

This release will simplify the setup of PSCAD v5.0.2, as it will be a single installer:

- Previously: Install PSCAD v5.0.2 (Original) first, then install PSCAD v5.0.2 Hot Fix 1
- Currently: Install PSCAD v5.0.2 (Update 1)
